Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3-8, 10 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. There is no support in the original specification for the following amended claim language: "wherein the control means act on a pivot whereon there is keyed.....the circular sector" (claim 1, lines 6-8), "rotating plate on which at least two dispensers of bakery products rests" (claim 1, lines 3-4), "wherein said member that controls the movement of certain elements of the apparatus acts on a pivot.....the circular sector" (claim 11, lines 9-11), "a rotating plate on which at least two dispensers of bakery products rest" (claim 11, line 3), etc. This is a new matter rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-8, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Holmes, et al. (US 4,094,236), Hirschson (GB 472,428), or Leich, et al. (US 1,232,576). The prior art references disclose the claimed invention except for the control means which acts on a pivot whereon there is keyed a circular sector provided with two pivots that rotate a toothed sector and a compensator both rotating around the pivot of the circular sector. It would have been an obvious matter of design choice to have the control means act on a pivot whereon there is keyed a circular sector provided with two pivots that rotate a toothed sector and a compensator both rotating around the pivot of the circular sector, since applicant has not disclosed that such a design choice solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
